The screenshot shows the NVivo software interface with the 'Internals' search filter applied. The main window displays a table of sources with the following columns: Name, Nodes, References, Created On, Created By, Modified On, and Modified By. The status bar at the bottom indicates 'CF 177 Items'.

Name	Nodes	References	Created On	Created By	Modified On	Modified By

1	Characteristics of It	Adaptability	Ability of "it" to be altered.	From Blasinsky et al. - The adaptations of the IMPACT model across the sustained sites also is an important finding and provides further support for prior research which suggests that organizations that modify and adapt an intervention to the context of their organizational setting are more likely to become committed to its sustainability (O'Loughlin et al., 1998). This suggests that the adaptability of an intervention is associated with program sustainability.	65	1	3	2	4	1	2	0	0	0	0	2	23
5	Characteristics of It	Complexity	The number of "it's" parts and extent of their interconnectiveness.	From Glanz - It is important to recognize that large multi-component interventions within research programs cannot be easily sustained, so advance planning to maintain a contribution to participating communities is essential.	19	3	2	0	2	0	1	0	0	0	0	0	3
6	Characteristics of It	Scope	The extent of the intended audience.	From Kanouse - The success of the dissemination strategy depends on how many of those in the target audience are reached and what effect the information has on their behavior. Evaluation results provide a happier story on reach than on impact.	18	1	0	2	1	0	0	0	0	0	0	0	2
7	Characteristics of It	Specificity	The level of detail of "it".	From Fishman - The concept of flexibly adaptive curriculum evokes Cohen and Ball's discussion of specification and development (Cohen & Ball, 1999). Specification is the explicitness with which an innovation is expressed; some innovations consist mainly of goal statements that suggest a general direction but little more. More highly specified innovations are clear about curriculum, intended teaching practices, and desired learning goals.	19	1	5	1	0	1	0	0	0	1	0	1	2
8	Characteristics of It	Effectiveness	Having evidence (can be empirical or informal) of "it" accomplishing desired outcomes.	From Cirves 2005 - We have found through our experiences running programs like McNair that reporting the results of positive formative evaluations can provide increased visibility and credibility to the program, which may in turn lead to its institutionalization.	98	11	6	4	10	0	3	0	0	0	0	0	20
9	Characteristics of People in the Organization	Characteristics of Implementer	The attributes of the individuals who have responsibility for	From Roman, et al. - In addition in top-down programmes, building and sustaining capacity requires an organizational capacity as well as the
