Organization focus: Standard Register is focused on helping the world's leading organizations advance their reputations through expert management and precise execution of their critical communications. With businesses in the financial services, healthcare and industrial markets, we use our 100 years of experience in printing, information management and data security to assist customers with solutions such as printed and electronic marketing campaigns, hospital patient identification and safety, patient communication, product labeling and brand management, secure checks and online payment management. We continually innovate new material science-based products and information technology solutions to further our ability to support customers in their communications execution.

STEM is important to Standard Register in a few ways:

- a. Our products and solutions are based on innovation in science, technology and engineering. We depend on our educational system to prepare future innovators for us!
- b. Based in Dayton for 100 years, the people of Standard Register care deeply about our community and continually look for ways to give back. Our partnership with the STEM school enables us to contribute to the community in a positive way.
- c. Through internships and projects, STEM education allows us to have access to new ideas and different ways of looking at things in our business.
